SUMMARY

Software Developer with 4+ years of experience primarily focused on the MERN stack, building scalable web applications and modern user experiences. Beyond traditional web development, I enjoy exploring technologies such as Chrome Extensions, desktop applications, automation systems, and open-source tooling to create practical, user-centric products.

SKILLS & TECHNOLOGIES

Frontend: CSS3, JS, Typescript, Jquery, Jest, Tailwind, MUI, React, Redux, Next.js, Gatsby, Vite, Esbuild, Prismic.js.

Backend: Node.js, Supertest, Express, Web-sockets, AWS, Redis, Docker, CI/CD, MongoDB, Supabase, Cloudflare Queues & DNS.

Tools: Git, Linux, Webpack, Babel, Postman, Selenium, MCP, Github Actions, Husky, Cursor, Claude-code, Warp, AI/LLM.

PROFESSIONAL EXPERIENCE

Software Developer at Pabbly (Bhopal, India)

06/2024 – Present

- Led code reviews and guided junior developers.
- Streamlined processes with automation tools and real-time webhooks.
- Optimized I/O operations using asynchronous programming.
- Handled third-party integrations, LLMs & APIs for smooth system connectivity.
- Managed MongoDB, Redis, and Pub/Sub-based workflows, ensuring data integrity.

Freelance Web Developer as Self Employed (WFH)

11/2023 – 04/2024

- Developed SSR/SSG web apps with third-party integrations and responsive UIs.
- Created the "Pdf Word Finder" Chrome extension using Express-PDF.
- Built a WhatsApp Web automation extension using whatsappweb.js.

Web Developer at Spicegems IT Solutions (Kota, India)

01/2022 – 07/2023

- Developed Shopify apps using TypeScript, adaptable to 800+ themes.
- Enhanced cross-browser compatibility, improving user experience.
- Contributed to popular Shopify apps with a 4.8+ star rating.
- Created Jest test cases, ensuring app functionality and reliability.
